

Product pictured is not the exact style of the product studied in this document.

Massaud Work Lounge

Product Environmental Profile is an environmental declaration according to the objectives of ISO 14021. Precise, accurate, verifiable and relevant information on sustainability attributes of Massaud Work Lounge.

Designed with a modern, residential sensibility, the Massaud Collection balances luxury and utility – beautifully crafted for comfort in the workplace. The collection provides design continuity with a global aesthetic across a range of seating solutions including lounge and conference seating.

Part Work. Part Refuge. Designed for comfort and connecting with technology, the Massaud Lounge, Work Lounge and Ottoman offer an alternative destination to work, contemplate or relax. The swiveling tablet brings work closer while settling back into a relaxed posture with the ottoman.

The model chosen for analysis is the most representative line (reference # COMCWL) from the Massaud range. Standard features on this model include:

- adjustable headrest
- swivel tablet
- 41.3H x 41.3W x 32.9D

Environmental Overview

Final Assembly Location

Final assembly of Massaud Work Lounge is in Tarnowo Podgórne, Poland for Steelcase for the EMEA (Europe, Middle East, and Africa) markets.

Life Cycle Performance >

Steelcase considers each phase of the life cycle: from materials extraction, production, transport, use and reuse, through the end of its life.

Materials >

Materials Composition

A break down of the basic materials in Massaud Work Lounge.

Materials Chemistry

Steelcase's materials chemistry practice aims to design products with materials that support human and environmental health, throughout all phases of the life cycle.

Recycled Materials and Recyclability

Massaud Work Lounge contains 24.0% recycled materials, by weight (9.0% pre-consumer + 15.0% post-consumer).

At the end of its useful life, Massaud Work Lounge is 97.0% effectively recyclable by weight.

Certifications and Labels >

The environmental and social performance of Massaud Work Lounge is communicated through the following voluntary labels/certifications:

- SCS Indoor Advantage™ Gold

LEED Contribution >

Massaud Work Lounge may contribute in the following areas:

- Recycled content
- Materials reuse
- Regional materials
- Low-emitting materials
- Interiors life-cycle impact reduction
- Daylight and views
- Building product disclosure and optimization - sourcing of raw materials
- Quality Views
- Construction & Demolition Waste Planning & Management

Life Cycle Performance

Steelcase considers each phase of the life cycle: from materials extraction, production, transport, use and reuse, through the end of its life.

Materials

This phase includes raw materials extraction and transformation into material ready to be used.

- **Massaud Work Lounge contains 24.0% recycled materials**, by weight (9.0% pre-consumer + 15.0% post-consumer).
- **Eco-labelled textiles OekoTex / EU Ecolabel / Cradle to Cradle Certified™** and rapidly renewable wool textiles available to specify with product.
- **Packaged with 100% recycled cardboard**

Production

This phase comprises all production and assembly processes taking place at Steelcase or at their suppliers and sub-suppliers.

- Final assembly of Massaud Work Lounge is in Tarnowo Podgórne, Poland for Steelcase for the EMEA (Europe, Middle East, and Africa) markets.

Transport

This phase includes downstream transports.

- Made in Europe

Use

During the use phase of the product - the longest phase of the life cycle - no significant environmental impacts occur.

- **Designed for a long product life**, with replaceable parts that are easy to change.
- Maintenance information available upon request.

End of Use

Any product can become a resource itself, or be responsibly disposed of in different ways.

- **Designed to enable responsible end of use strategies** - re-selling, refurbishing, charitable donation or recycling.
- **97% effectively recyclable by weight**, according to the current waste disposal schemes.
- **25% effectively recyclable packaging.**
- **Designed for quick and easy disassembly of materials** - with no permanent assembly.
- **Primary plastic parts clearly labelled for easy sorting and effective recycling**, according to ISO 11469.
- **Steelcase offers a comprehensive asset management service for furniture that is no longer needed.** For more information, and to see if this service is available in your area, please contact Eco'Services at eco-services@steelcase.com.

Materials

Massaud Work Lounge materials composition is listed below*.

METALS

| | kg | % |
|---------------------|------|------|
| Steel | 11,4 | 18,8 |
| Aluminum (cast) | 8,3 | 13,7 |
| Aluminum (extruded) | 0,7 | 1,2 |
| Bronze | 0,5 | 0,8 |

PLASTICS

| | kg | % |
|---------------------------------------|-----|------|
| Polyethylene (PE) | 8,6 | 14,2 |
| Polypropylene (PP) | 0,7 | 1,2 |
| Nylon (PA) | 0,7 | 1,1 |
| Polystyrene (PS) | 0,5 | 0,7 |
| Acrylonitrile butadiene styrene (ABS) | 0,3 | 0,6 |
| Synthetic rubber | 0,1 | 0,4 |
| Polyoxymethylene (POM) | 0,1 | 0,2 |

OTHER MATERIALS

| | kg | % |
|-------------------|-----|-----|
| Polyurethane foam | 3,3 | 5,5 |
| Polyester fabric | 2,8 | 4,6 |

TOTAL WEIGHT – incl. packaging 38,0

*The list of materials does not contain all materials used in the product (adhesives, coatings, residuals, etc.).

Materials Chemistry

Steelcase's goal in its materials chemistry practice is to design products with materials that have been evaluated or assessed for several human and environmental health criteria – all in an effort to understand and optimize the products throughout their life cycle.

Steelcase is working with our supply chain to inventory and assess materials in this product down to 0.01% (or 100 ppm) in each homogeneous material with the intent to eliminate chemicals of concern and optimize with healthier materials of equal or greater functionality.

We have contacted our suppliers for all products sold in the European Union to ensure that our products are compliant with REACh (Registration, Evaluation, Authorization and Restriction of Chemicals). When information from suppliers is not available, we rely on testing to ensure that our products meet required standards.

Steelcase intends to refrain purchasing products, components, or materials containing any “Democratic Republic of the Congo (DRC) Conflict Minerals” (coltan (from which tantalum is derived), cassiterite (tin), gold, wolframite (tungsten), or their derivatives), and any other minerals or derivatives which the U.S. Secretary of State determines to be financing conflict in the DRC or an adjoining country.

Recycled Materials and Recyclability

Recycled materials are determined by weight and defined in accordance with the ISO 14021. They may include pre- and post-consumer materials:

- Pre-consumer materials (or post-industrial recycled materials) are materials diverted from the waste stream during a manufacturing process. Excluded is reutilization of materials such as rework, regrind or scrap generated in a process and capable of being reclaimed within the same process that generated it.
- Post-consumer materials are materials generated by households or by commercial, industrial and institutional facilities in their role as end-users of the final product, which can no longer be used for its intended purpose. This includes returns of material from the distribution chain.

MASSAUD WORK LOUNGE

| | kg | % |
|--------------------------------|------------|-----------|
| Pre-consumer recycled content | 3,5 | 9 |
| Post-consumer recycled content | 5,8 | 15 |
| Total recycled content | 9,3 | 24 |

- Pre consumer - Recycled content
- Post consumer - Recycled content
- Virgin material

*Calculations of recycled materials are based on data provided by professional organizations, suppliers and other available information. Recycled content figures are based off of product weight only, and exclude packaging for evaluation to LEED contribution and other purposes. This data may include industry averages, ranges or other broadly based information. Steelcase makes conservative assumptions when compiling this information to provide the most accurate recycled content calculations possible but variability in market conditions or manufacturing processes may result in higher or lower content. This document will be reviewed and updated periodically and is subject to change without notice.

Recyclability

Steelcase considers a material recyclable if it can be effectively collected, sorted, processed, and converted into raw materials to be used in the production of new products.*Recyclability calculation does not include packaging.

97%

According to the available waste management infrastructures, we estimate that 97% is effectively recyclable.

*To be compliant with applicable regulations, Steelcase calculations are based on the materials having physical properties that allow recycling, our evaluation of the ability to disassemble the products and that actual availability of recycling services in the markets where the products are sold.

Certifications and Labels

To show continuous improvements, Steelcase communicates the environmental and social performance of its products through voluntary labels and declarations.

ON THE PRODUCTS

SCS Indoor Advantage™ Gold

This product is targeted for SCS Indoor Advantage™ Gold, certification according to the indoor air quality emissions requirements defined by the ANSI/BIFMA M7.1- 2011.

ON THE MATERIALS

Cradle to Cradle Certified™

A selection of Cradle to Cradle Certified™ textiles are available. Cradle to Cradle Certified™ products are evaluated for material health, material reutilization, renewable energy and carbon management, water stewardship, and social fairness.

European Ecolabel

A selection of pure wool fabrics are labelled with the European Ecolabel, guaranteeing that it meets stringent quality and environmental performance criteria.

Oeko-Tex

A selection of fabrics are certified with the Oeko-Tex 100 Standard, guaranteeing a limited presence of harmful substances.

LEED V3 – 2009

LEED, or Leadership in Energy & Environmental Design, is a green building certification program that recognizes best-in-class building strategies and practices. Massaud Work Lounge may contribute to a project's pursuit of LEED certification across the three rating systems:

- LEED-ID+C - Interior Design & Construction 2009 (formerly LEED-CI)
- LEED-BD+C - Building Design & Construction 2009 (formerly LEED-NC, LEED-Core & Shell & LEED-Schools)
- LEED-O+M - Operations & Maintenance (formerly LEED-EB)

| CREDITS | RATING SYSTEM | | | POTENTIAL CONTRIBUTION* |
|-------------------------------------|---------------|--------------------------------------|--|--|
| | ID+C | BD+C | O+M | |
| Materials & Resources | | | | |
| Recycled content | MRC4 | MRC4 Healthcare: MRC5 Option 3 | MRC2.2: Sustainable purchasing- Furniture | Massaud Work Lounge contributes to the project recycled content criteria: post-consumer (15.0)% + ½ pre-consumer (9.0)% = 19.5%. |
| Materials reuse | MRC3.2 | Healthcare: MRC5 Option 3 | | If chosen for reuse, this product can contribute to the 30% valuation of the furniture & furnishings budget |
| Regional materials | MRC5 | Healthcare: MRC5 Option 3 | | Massaud Work Lounge is assembled in Tarnowo Podgórze, Poland for EMEA orders. Projects <500 miles (800 km) from this location qualify. |
| Indoor Environmental Quality | | | | |
| Low emitting materials | EQc4.5 | Healthcare: MRC5 Option 2 | N/A | Massaud Work Lounge is SCS Indoor Advantage™ Gold (depending on options) certified for indoor air quality in EMEA. |
| Daylight and views | EQc8.1 & 8.2 | EQc8.1 & 8.2* | EQc2.4 | Steelcase offers a range of products and application thought starters to assist customers in achieving these credits. |

*For potential contribution: These are the probable contributions; exact contributions will be dependent on the LEED rating system and the specific product.

**For LEED BD+C: New construction, these standards do not currently apply to furniture in the IEQ credit; however, the USGBC has allowed equivalent credit for furniture / furnishings when submitted as an Innovation in Design credit.

LEED V4

LEED is a rating system that drives integrated design thinking as it relates to various aspects of green buildings. Massaud Work Lounge can contribute to a project's pursuit of LEED Certification across the three rating systems:

- LEED-ID+C - Interior Design & Construction
- LEED-BD+C - Building Design & Construction
- LEED-O+M - Operations & Maintenance

| CREDITS | RATING SYSTEM | | | POTENTIAL CONTRIBUTION* |
|--|--|---|--|---|
| | ID+C | BD+C | O+M | |
| Materials & Resources | | | | |
| Interiors life-cycle impact reduction | Option 2: Furniture Reuse | N/A | | Steelcase products are designed to be long lasting and durable-- often making reuse a feasible option, depending on project needs and desirability. |
| Interiors life-cycle impact reduction | Option 3: Design for flexibility | N/A | | If chosen for reuse, this product can contribute to the 30% valuation of the furniture & furnishings budget. |
| Building product disclosure and optimization - sourcing of raw materials | Option 2: Leadership extraction practices | Option 2: Leadership extraction practices Healthcare - Medical furniture & furnishings Option 3: Multi-attribute assessment | Purchasing - facility maintenance and renovation Option 2: furniture | Extended Producer Responsibility - Steelcase offers different end of use / end of life programs for different markets, to reuse, resell, refurbish, donate, or recycle the mix of existing assets – all in an effort to divert materials from the landfill (See notes below). Bio-based materials - Steelcase offers select textile and surface material options that may contribute to this credit. Wood products - Steelcase offers FSC™ certified wood as an option on select products, which contributes to this option. Materials Reuse - If chosen for reuse, this product can contribute. Recycled content - (15.0%) post-consumer + ½ pre-consumer (9.0%) = 0.2%. |
| Construction & Demolition Waste Planning & Management | Required | Required | N/A | Steelcase uses several innovative packaging initiatives to minimize our waste impact (see transport section). These efforts may help to contribute, in part, towards achieving this prerequisite or credit. |

*For potential contribution: These are the probable contributions; exact contributions will be dependent on the LEED rating system and the specific product.

Other Potential LEED V4 Contributions

| CREDITS | RATING SYSTEM | | | POTENTIAL CONTRIBUTION* |
|-------------------------------------|--|---|---|---|
| | ID+C | BD+C | O+M | |
| Indoor Environmental Quality | | | | |
| Low emitting materials | Option 1: Product Category Calculations or Option 2: Budget Calculation Method | Required Option 1: Product Category Calculations or Option 2: Budget Calculation Method Furniture and medical furnishings Option 2: testing and modeling of chemical content | Purchasing - facility maintenance and renovation Option 2: Furniture | Massaud Work Lounge is SCS Indoor Advantage™ Gold certified for indoor air quality in EMEA. |
| Quality views | Credit | Credit | Daylight and quality views Option 2: Quality views | Steelcase offers a range of products and application thought starters, though several other factors play into achieving this credit, beyond the scope of furniture. |

*For potential contribution: These are the probable contributions; exact contributions will be dependent on the LEED rating system and the specific product.

Refer to www.usgbc.org for LEED Program details.

Steelcase sustainability related actions and results are communicated annually in the [Corporate Sustainability Report](#).
